- Thank you!

Acknowledgements

- Thanks to my father ,my tutors at Clevered, and Clevered itself, I got to this point; without them I would still be stuck on the question,” How can I get the project to recognise words, ma’am?”.

About Me..

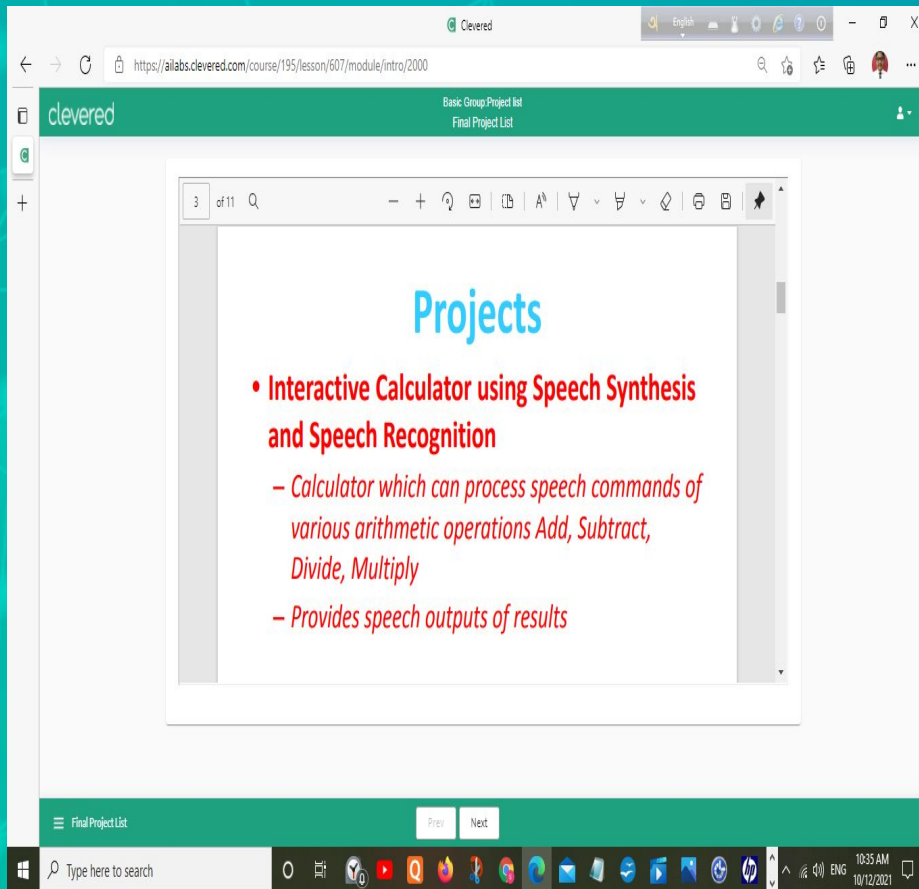

My Introduction:

Name: Yashjit Das

Class: 5

Age: 10

About My Internship with Clevered..

My internship experience with Clevered:

- It has been hyper interesting and fun, especially the coding part!

Badges Earned:

- 1 Rockstar for joining early.
- 1 Rockstar for presenting.

About My App..

- **App's Main Menu**

- Give me a First number
- Give me a Second number
- Which operation will I do?
- Answer in Voice Output

- **App's Introduction**

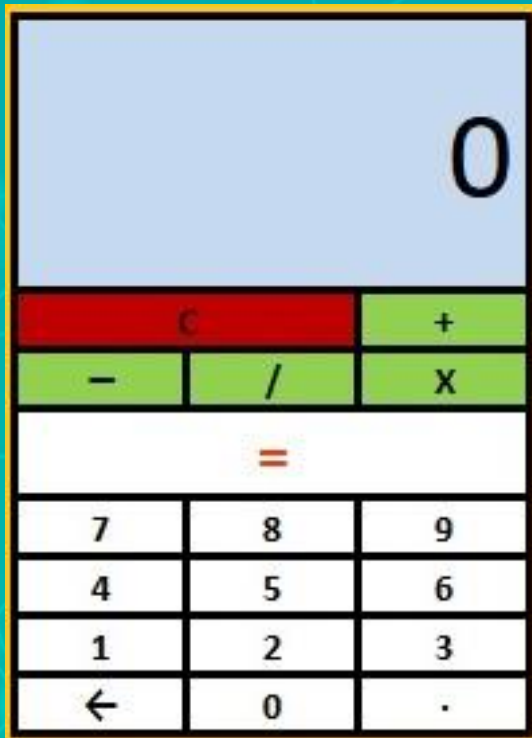

- It's a calculator app to help blind people to calculate using voice commands. Its input and output are through voice.

How do I use the App?

At first, at a click on the green flag, the app will request the user to give it a first number. Then it requests the user to give it a second number. After that it will ask to tell it which operation to do. It will do the operation and will tell the answer.

Option Name

(This will be repeated for each option of the App)

- **Steps to use the same**
 - It will ask the user to give it a first number. It will memorize the same.
 - Then it will ask the user to give it a second number. It will memorize the same.
 - After that, it will ask the user to tell it which operation to do.
 - It will do the operation with those two numbers.
 - It will tell the answer using voice synthesis.
- **Any special considerations/dependencies/risks while using the option : Nil**
